

Transition From Data to Knowledge

Applications for Land Administration

D.Dighal , Esri India

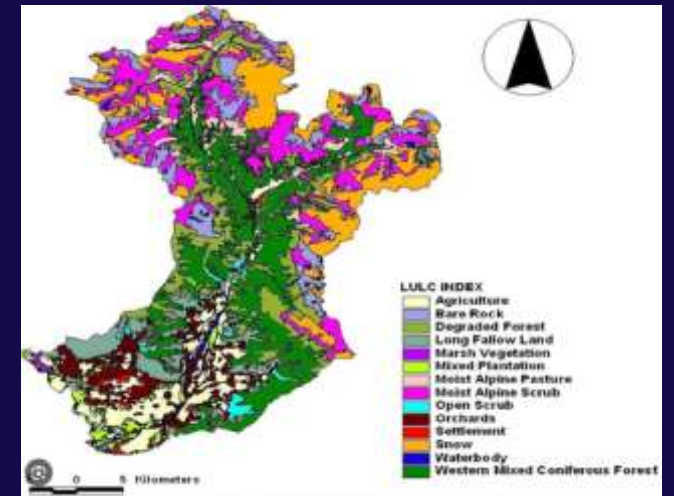

Preamble

- Land Record is Dynamic.
- Land has a Value and sometimes it's the ONLY asset to Citizens.
- Land Record , Land Use , Land Cover is an important data for country growth
- Boon for BFSI (Banking , Finance , Insurance sector) with Digital Property Card

Land

- Record of Right
- Plot & its dimension
- Land Use & Land Cover
- Valuation

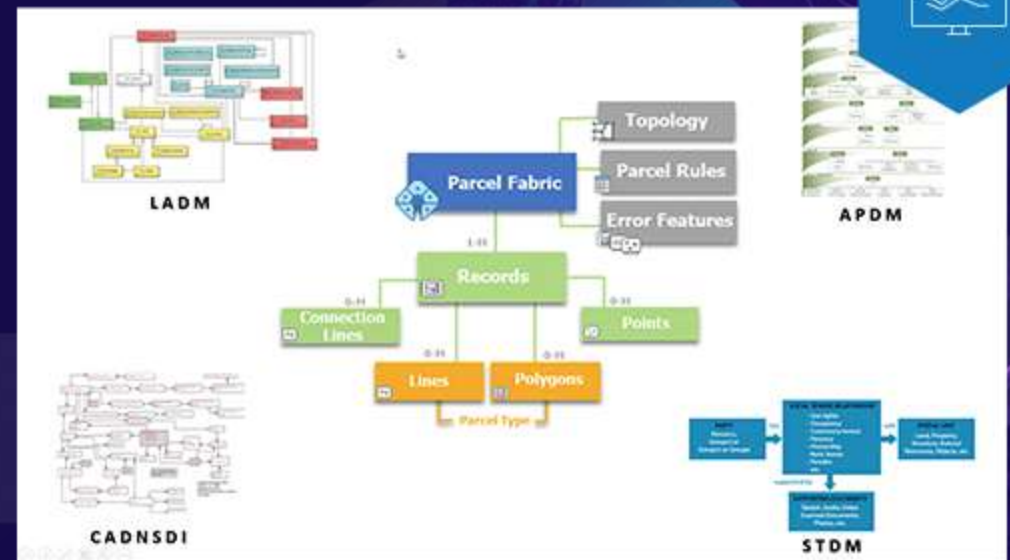

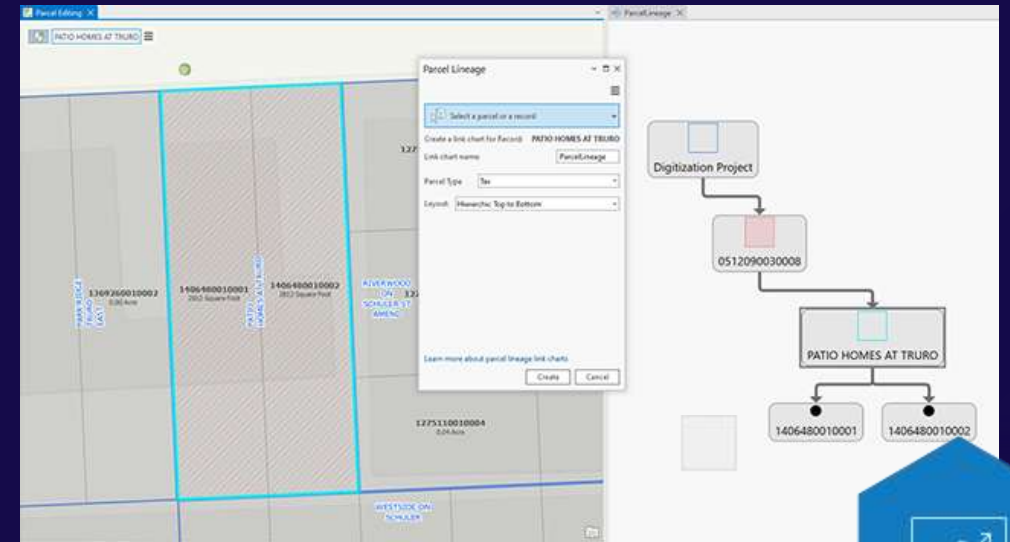

RECORD OF RIGHTS, FARMING AND CROPS FORM NO.16
Village Account Form No.2
As on 28/06/2016

Village Model-2: Seal of Taluka: Taluka: Hukkeri Hotel: Sankoshwar Village: Kanagala Page No. 1

1. Survey No	3. Measuring	Acres - Gs.	4. Revenue	Ra.	Pl.	5. Name, father's name & address of the person in possession	Area - Gs.	Ac/N	10. Possession or way of possession	11. Other rights and liabilities					
315	Total area P.K.(A) P.K.(B) Balance	172.06.00.00 172.06.00.00	A) Land revenue B) Jodi C) Cesses D) Water Rate	-	-	Government	172.06.00.00	1	RT-77	Rights Liabilities					
2. Hissa -		Total													
5. Type of Soil		7. No. of Trees		8. Land use Area of irrigation											
Khadak		Name No. SI No		Source of irrigation		Rabi Kharif Irrigated To tal									
4. Patta															
Sarkari															
12. Cultivation and Extent details										13. Use of land and Crops detail					
Year & Period	Name of the Cultivator & Address	Cultivation method	Details Extent		Use of land		Kuzhki, Tari	Name of the Crops	Crops extent			Source of irrigation	Yield per Acre	Total Double crops	
			Area A Gs.	Contract	Class	Area A Gs.			Single	Double	Total			Area A Gs.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
2015-2016	Government	1	-	-	-	-	-	No Crop Info	-	-	-	-	-	-	-

Unlock the potential of Legacy Plot data

- Flexible Data Model to Manage 3D and 4D parcel data
 - 2D
 - 3D
 - 4D (Changes over time)
- Historical parcels and lineage
 - Tracking the legal record that causes parcels to be created and edited
 - The ArcGIS Parcel Fabric saves the parent parcel data as historic when edits are performed.
 - The historic parcels maintain a lineage to the parent and children parcels.
- Web GIS enabled

Table 1: Available Circle Rate features at selected location

Village Locality Road Name	Type (Road/Revenue /Urban)	Buffer Distance	W. SC
Pindawli	Revenue	0	Pl

Table 2: Property Subtype wise highest Circle Rate values at selected location

CR Non Agri Beyond 200	CR Agri Beyond 200	CR Flat	CR
300	2500000	26300	21

Table 3: Property Type wise applicable Circle Rate(highest) at selected location

Property Type	Circle Rate (₹)

Land Records Management Programme in India & Role of GIS

DILRMP

(Digital India Land Record Modernization Programme)

- Non Abadi Area
- Computerisation of LR
- Automation of Sub registrar office
- Integration of LR & Property Registration
- RoR in the Web
- Survey / Resurvey
- Digitisation of Cadastral Map
- Textual & Spatial Data integration
- Creation of modern Record Room
- Citizen Centric Interface

SVAMITVA

(Survey of Village Abadi & Mapping with Improved Technology in Village areas)

- Adadi Area
- Drone Survey of Abadi area
- Fresh Digitization and Ownership data capture
- End to End Digital Land survey
- CORS aided field data capture
- Digital Property Card
- Citizen Centric Interface
- BFSI sector ready database

3 Phase implementation

1. Integration of Image with Existing Map in central GIS lab
2. Creation of GIS Lab & working manual
3. Data model designing
4. Version Management

1. Enterprise GIS based feature & Image service publishing.
2. Job allocation for field survey
3. CORS enabled Android rover based Data update
4. HQ & District Based QA/QC

1. Enterprise based ULPIN integration
2. Implementation of Geo-Blockchain for dispute free property
3. Land valuation
4. Citizen Interface & subsequent self update

Enterprise Grade Version Managed Centralized Database

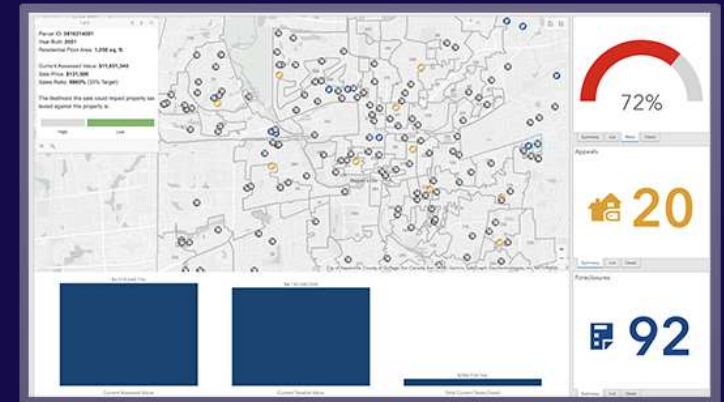

The seamless data flow from Lab to Field-Components

Cloud Based Drone Processing

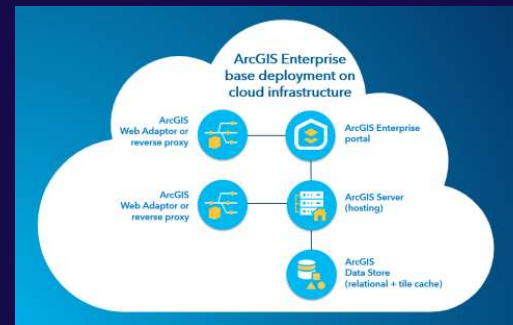

Desktop GIS with Workflow and Version managed Geodatabase

Dynamic GIS Portal with Dashboard
Dynamic GIS Portal with Dashboard

SOI- CORS

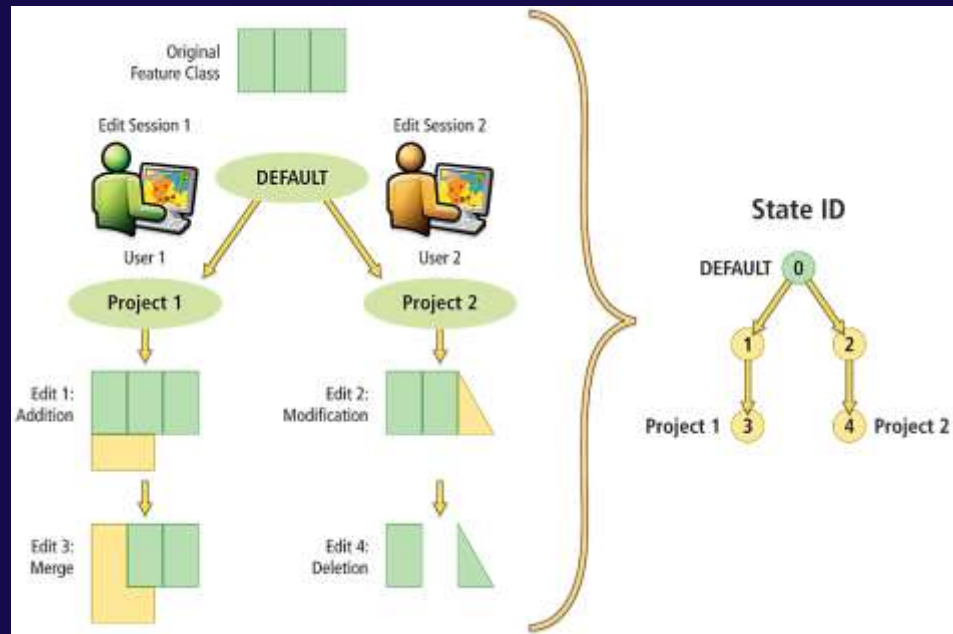

Geospatial Cloud

High End GNSS in BYOD
Mode utilizing CORS

Version Management

- allows multiple editors to alter the same data in an enterprise database duplicating data
- Reconcile and post changes (Field or Lab update)
- Store all backward updates of the plot to roll back.

Role of Cloud

- Meity Cloud Policy help Land Record department to Store , Process , Roll out technology quickly
- Drone Processing in cloud help quick turnaround time
- ArcGIS enterprise on cloud help complete end to end data management
- Rolling out Citizen centric interface can be scalable , due to elastic nature of cloud

Digital & Connected Survey for Update

Workflow management from Lab to Field

- Automate Production process of Map
- Allocate Job
- Automate repetitive manual tasks such as data preparation and cleanup

Job Name	Assigned To	Status	Progress	Start Date

One App for All

- Currently there many App (Each state has their own app)
- Citizen should be able to alter their Land data and get verified (like Aadhar)
- Ownership change can be initiated by citizen

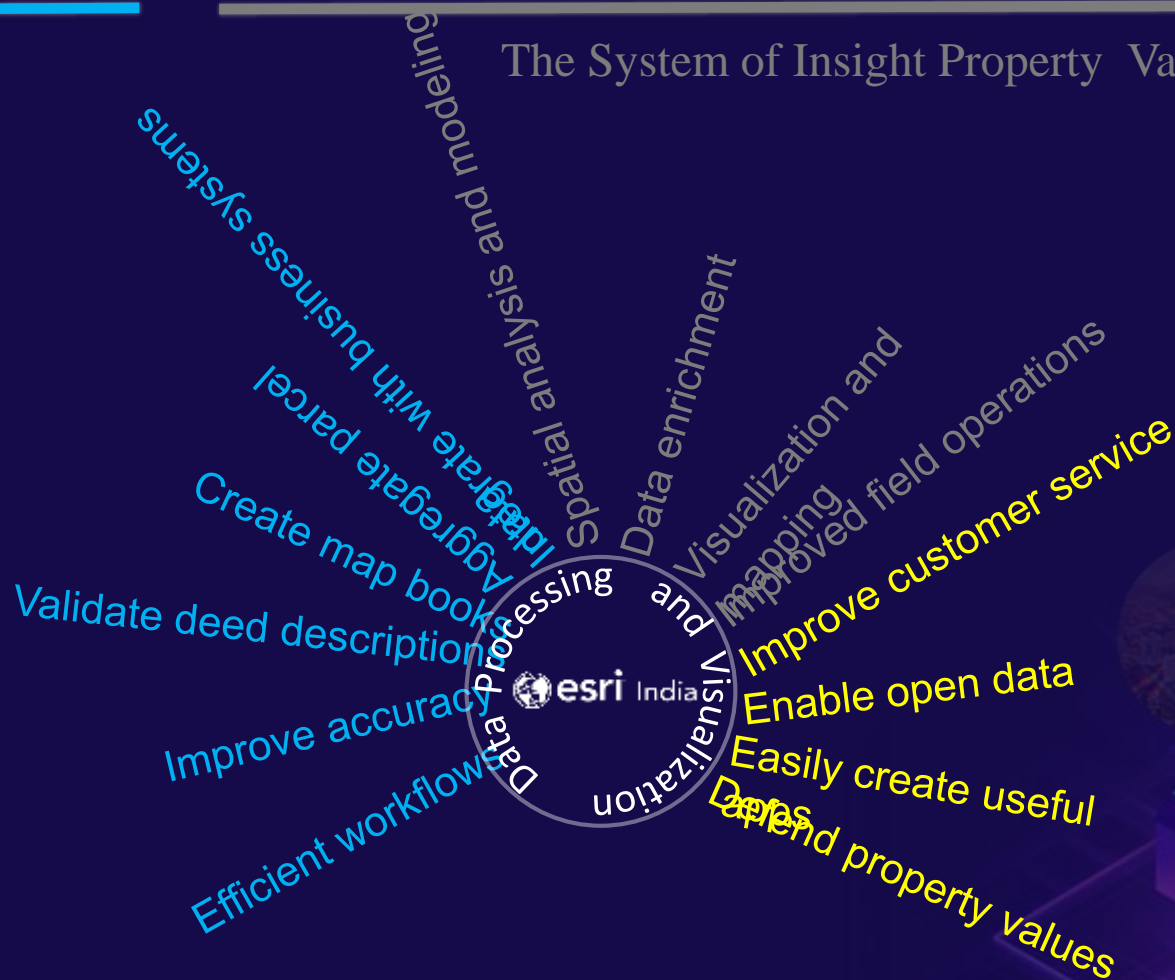

Hub and Site for Citizen Engagement & Data sharing

- Land Data is an asset which can be shared to other Govt dept
- Rest API / OGC service for consuming data

The System of Record Parcel Management

Stakeholder Engagement
