

# From Data to Knowledge – Land Administration

Brahmam GVS

# Land Information Ecosystem of Allies

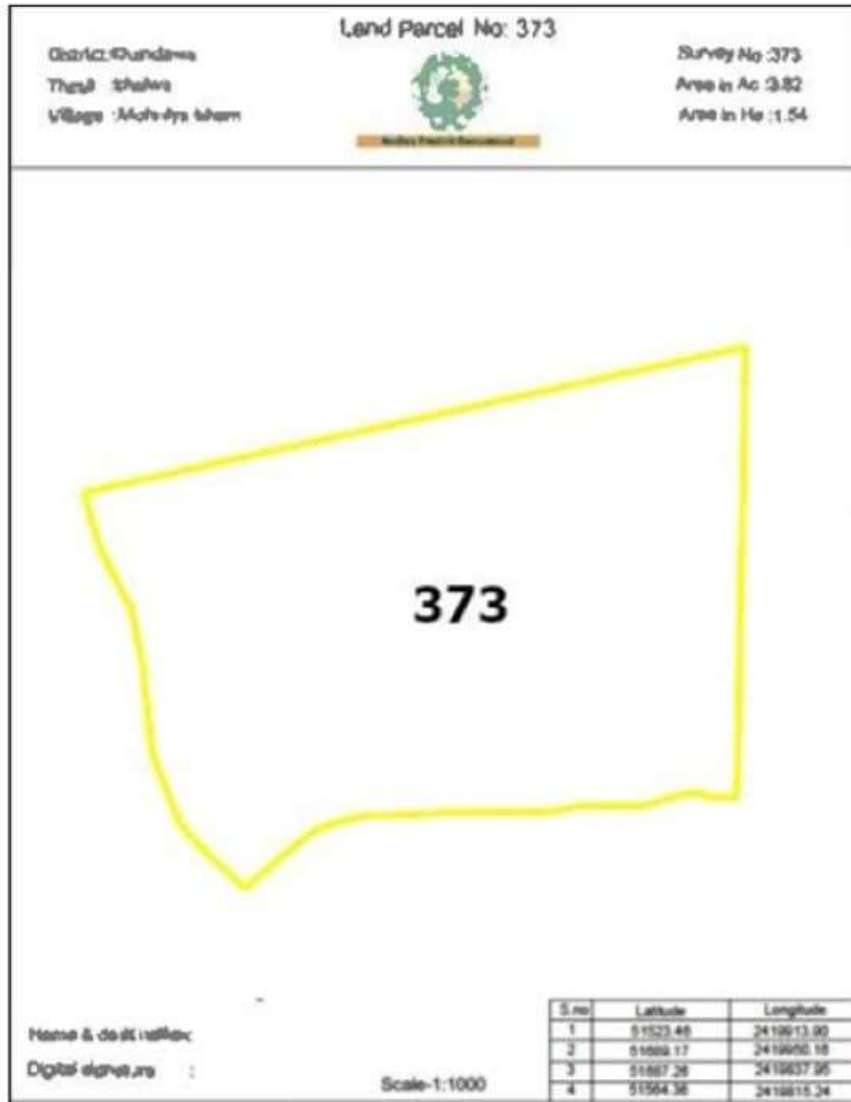

# Legislative Framework and Business Processes Relating To Property Transactions

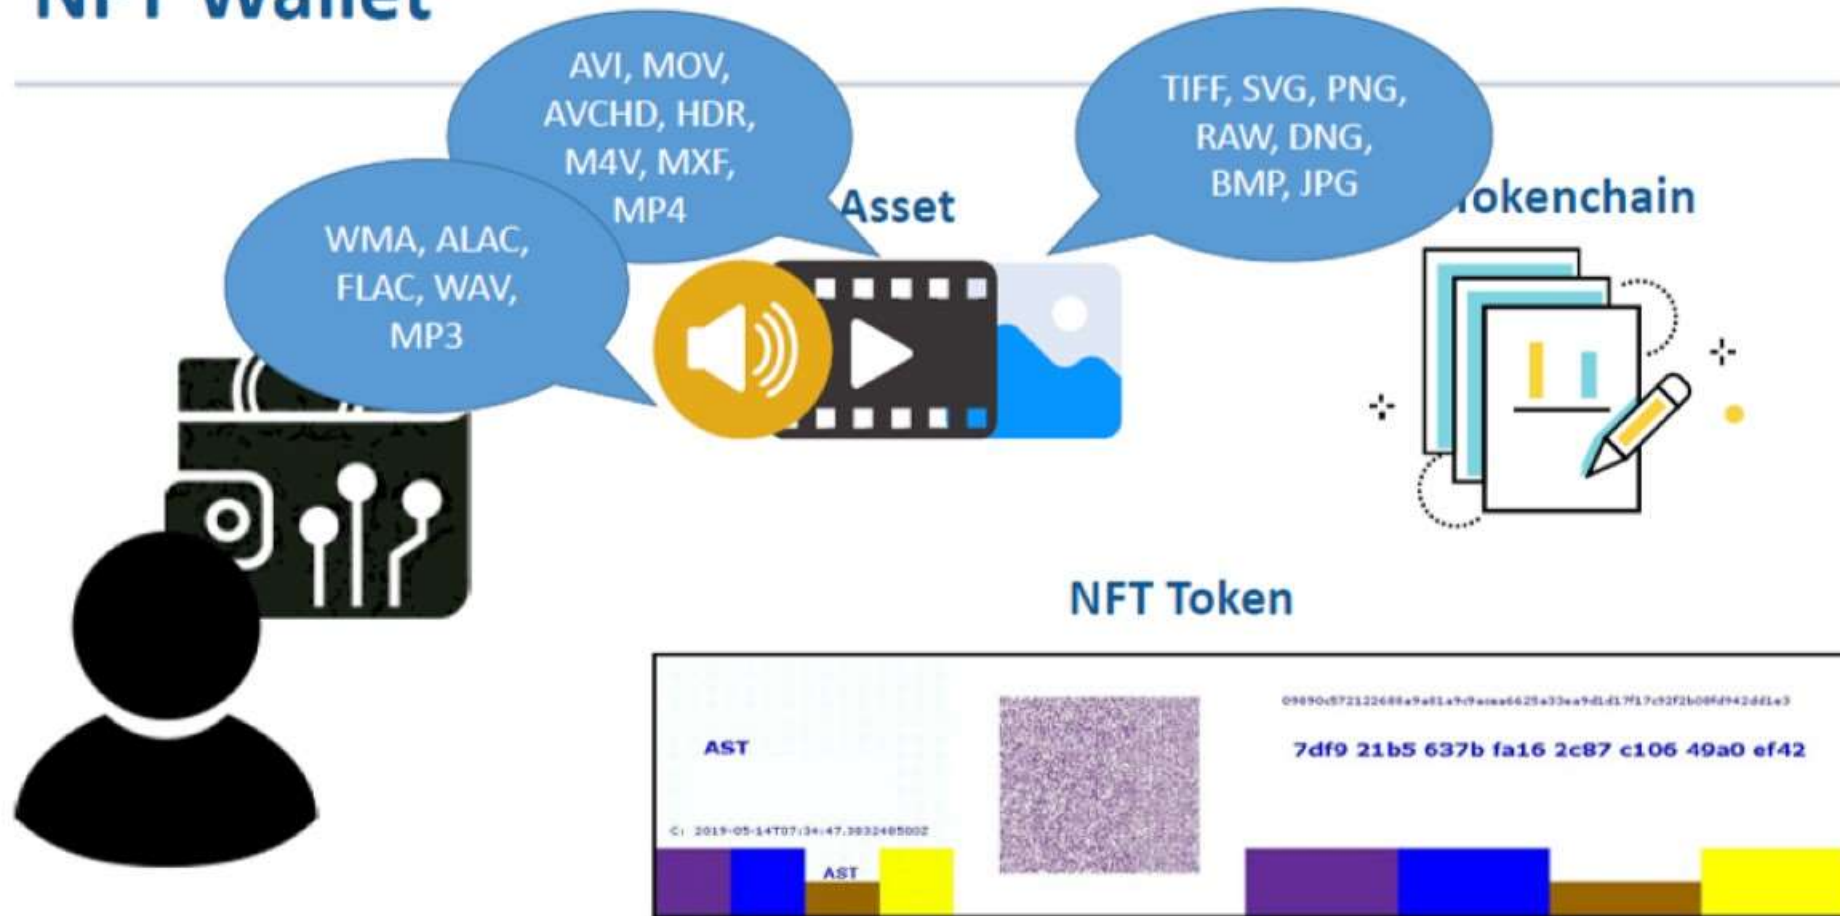

# Essential Elements of Future Land Administration Systems

- Fully Digitalized - containing information about rights, restrictions and responsibilities relevant to all properties, parties involved
- Transparency and Authenticity with regards to Reliable data and Service quality
- Interoperable throughout the country with regards to data production, dissemination, and visualization
- Fostering Greater Coherence and Commitment between Stakeholders and Decision-makers
